N.B. All the exercises are to be sung, at first, on various vowels (a, o, e), and, later, on the syllables written under them. Do *not* observe, at first, the directions given for shading, but execute each exercise in a quiet, smooth *piano*, and as *legato* as possible. The tempo to be employed depends on the needs and the ability of the singer. At every rest, and at the breathing - marks (v), breath *must* be taken; it *may* also be taken (if necessary) at the commas (,) .
